Bridge Party

The home of Mrs. H. G. Williams was the scene of a very enjoyable evening Friday May 11th, when Mrs. Williams and Mrs. Smathers entertained jointly at bridge. Five tables were in play, Mrs. Leo Ray and Mrs. Geo. Thomas won the ladies' honors, while Mr. A. Molyard and Mr. Kerr were the lucky gentlemen.

A delightful midnight lunch was enjoyed by all and the party given by these two popular hostesses was a great success.

Mrs. M. H. Olson entertained twelve of the local ladies at her home on Monday, May 14, in honor of Mrs. H. G. Williams. The afternoon was spent in playing bridge. Mrs. A. C. McNair and Mrs. W. G. Walker being the winners, while Mrs. N. G. Spiece captured the consolation prize. After the card, the ladies adjourned to the dining room where a delicious lunch was served. The table was centred with a two-tier birthday cake, and after lunch Mrs. Williams was presented with useful gifts and the good wishes of those assembled.

Mrs. Wilson had an 'at home' on Saturday last, the following being present: Mrs. McNair, Mrs. Goguliot, Mrs. Taylor, Mrs. A. Ray, Mrs. Grant, Mrs. Stevenson, Mrs. Devereaux, Mrs. Sorum, Mrs. J. Ray, Mrs. Penikese, Mrs. Leckie, Mrs. W. Ray, Mrs. Williams. A very enjoyable time was had by all, the hostess providing a lovely lunch at the close.

NOTICE

To the Proprietary Electors of the Village of Mirror.

Notice is Hereby Given that the Council of the Village of Mirror intend to pass a bylaw, which bylaw has been approved of by the Board of Public Utility Commissioners, authorizing the Mayor and Secretary-Treasurer to sign and execute on the behalf of the Village, a certain franchise agreement with the Calgary Power Company, Limited, for the exclusive supply of electric light and power to the said Village and its inhabitants for a period of 10 years, on the terms set out in the said agreement which is annexed to the said bylaw and described as Schedule "A" thereto.

AND NOTICE IS FURTHER GIVEN that unless a poll of Proprietary electors of the Village, for and against the bylaw, is demanded within fifteen days from the date of the first publication of this notice, namely May 10th, 1928, the said council will proceed to give effect to the said bylaw by executing the said franchise agreement.

A copy of the said bylaw and franchise agreement may be inspected by any ratepayer at the office of the Secretary-Treasurer of the Village between the hours of 9 a.m. and 12 noon, and 2 p.m. and 5 p.m. of each week day (statutory holidays excepted) within 15 days of the 10th day of May, 1928.

DATED this 8th day of May, A.D. 1928.

Fred McDonald, Mayor.

J. G. Russell,

Secretary-Treasurer.

Local Brevities

We are sorry to report that Mrs. Floyd Phelps has been taken ill with typhoid fever. Some flowers were sent from the United Church on Sunday.

Jim Cairns unloaded a new Hart-Parr tractor Monday and is using it on the main street.

Mr. and Mrs. Roy Harris of Oakdale, Cal., arrived May 8th and are visiting with her parents in Mirror. They intend to locate in Calgary.

J. P. Walters and family motored to Big Valley Sunday, where they visited with Mr. Murray.

Mrs. A. Boyer, mother of Mrs. Smathers, is having her home which she recently purchased, moved on to the lots next the post office, contractors from Lacombe being in charge of the moving. A wall is being drilled on the property this week.

Rev. John Goddard, Stettler, will occupy the pulpit of the United Church on Sunday evening. Mr. Wood will take the services at Erskine and Stettler.

Geo. Burt purchased a new Whippet last Saturday.

The annual Mothers' Day service took place in the United Church on Sunday evening last. The church was beautifully decorated for the occasion by G.O.P.T., with spring flowers. Special music was rendered by the choir and an appropriate sermon by the minister for the day. At the conclusion of the regular service, the officers and teachers were installed by the minister and session.

Mr. N. G. Spiece motored to Lacombe on Sunday.

Don't forget the L.O.O.F. dance to be held in the Grand theatre, tonight.

Andrew Common is the owner of a new Paige sedan.

Quite a large number of Mirrorites motored out to the river where the new bridge is under construction.

R. H. White, field secretary for the Orange lodge paid a visit to Mirror on Tuesday.

Mr. H. O. Lund and Lawrence motored to Blackfalds Sunday.

The Mirror Garage received a carload of Overlands this week and another one is following.

Mr. and Mrs. L. P. Pinkler spent Sunday with her parents Mr. and Mrs. Philip Nels.

N. G. Spiece received a shipment of Essex cars.

Sweet peas and garden peas are already showing through garden east of town. Who says Spring hasn't arrived?

Those who wish, may leave their subscription with the postmaster; and don't forget to let us have that news item.

N. G. Spiece is installing a gasoline storage tank this week.

Mr. and Mrs. F. Whiting returned on Saturday from a motor trip to Calgary and Sheppard.

The W. A. held a tea in the library room Wednesday.

Mrs. Ray, Mrs. Wilson, Mrs. Goguliot, Mrs. Taylor, Mrs. A. Ray, spent Wednesday afternoon at the Sorum farm.

New Developments In Method Of Harvesting And Threshing Will Revolutionize Farming

More marked progress in the development of methods of harvesting and threshing grain applicable to the prairies of Western Canada has been made in the past few years than in the previous half century since the first stream of settlers crossed the Red River. The new methods of combining and threshing are resulting in great economies in labor and money. When introduced the combine or reaper-thresher was considered to have limited applicability and that principally to the drier sections of the country. Nevertheless the number of these machines in use has increased very greatly and they are spreading over a much broader area than was thought possible.

A supplementary machine introduced on the prairies for the first time last year, says the Department of the Interior, through its Natural Resources Intelligence Service, is expected to further extend the field for direct harvesting and threshing and will do the need for the expensive and time-consuming operation of stacking the grain. The features of this new machine is that the straw is cut high and slightly turned over forming a shell on which the grain is laid out in windrows to dry. With the air currents passing underneath turning is rapidly effected. In two to four days the grain is ready for threshing and with a pick-up attachment the combine is then used to finish the operation, delivering the threshed grain into the tank wagon. Later in the harvesting season the grain in other fields may become sufficiently matured for direct combining without the windrowing.

The windrow machine is claimed to have removed all the disadvantages of the combine. If so the new methods may be expected to quickly spread across the prairies and revolutionize the harvesting of grain in Western Canada. Nowhere in the world is there land more suitable to large scale methods of harvesting and the resultant economies may be expected to further enhance Canada's position as the premier wheat exporting country of the world.

Vancouver Island Strawberries

An Exceptionally Heavy Crop To Be Gathered This Year

A heavy crop of strawberries is in prospect on Vancouver Island, B.C., this year. A precise description from Vancouver states: The Gordon Head and Keating crop is expected to pour hundreds of thousands of dollars into the farmers of South Island this summer as a reward of persistent adherence to modern cultivating and weevil control methods. Within a few years a plan to plant strawberries shows substantial increase, anticipations of a somewhat crop rich chiefly upon the favorable condition of the plants, which are in better shape than has been known for many years.

Nineteen carloads of beef cattle, 415 head, were shipped recently from Ashcroft, B.C., to Toronto, Ont., the largest shipment of cattle from that part of British Columbia to Eastern Canada.

A "mechanical man" that plays chess and automatically responds to the moves made by its human opponent has been invented by a Spanish mathematician.

Developing Tar Sands Deposits

The Hudson's Bay-Marland Oil Company has made application for exclusive rights to prospect a very large area in the Alberta tar sands region in Northwestern Alberta. Negotiations are now in progress between representatives of the company and the Federal Government. This company will this year spend \$50,000 in the erection of plants for the extraction of oil from the sands.

People of France are buying fewer automobiles this year, and French factories are turning out a lesser number of cars than usual.

IMPROVES QUALITY OF WOOL

Sheepmen Advised To Keep Out Dark Hairs When Shearing

"We are well satisfied with the Canadian wool we have been handling for the past seven years," R. C. Winder, of Winder & Company, operating in London and Bradford, England, and representing the Canadian Co-operative Wool Growers in Britain and Europe, told the Wool Growers at Toronto when visiting there the other day. "There is a big demand for your clip and mills who have tried it out are coming back with repeat orders."

In discussing wool with G. E. O'Brien, General Manager of the Canadian Co-operative Wool Growers, Mr. Winder stated that he had one suggestion to make and one which could easily be carried out by the sheepmen themselves. In shearing the heads and legs, it is customary to remove the dark or grey hair, particularly where the down breeds are being handled. This amounts to practically nothing in weight, but when it is tied up with the rest of the fleece it gets mixed in so with the wool during processing in the mills that it cannot be removed. These little short dark hairs will not take the dye, and therefore, they make the wool less fit for manufacturing into the more expensive light colored yarns, hosiery, and cloth. Mr. O'Brien stated that, in his opinion, the bulk of the dark hair complained of in Canadian wool is traceable to this cause.

Sheepmen are strongly advised by the Canadian Co-operative Wool Growers to make sure that these tufts of hair do not get in with the fleece. As previously mentioned there is practically no loss in weight when this material is thrown away.

Plan New Settlement

Belgian Farmers Intend To Establish Colony In Alberta

What may be the nucleus of an entire new settlement in Alberta arrived in Winnipeg recently in the persons of a group of 20 Belgian farmers, members of the party of 400 new settlers to the west.

Though possessed of some capital and predilection for the finer farming in agriculture, these Belgian farmers plan to work on Canadian farms for several months to gain familiarity with farming methods over here. When they feel they know enough about the conditions in Canada, they plan to seek for their families and relatives, and establish a whole colony near Magrath, Alberta. Each member of the group expects to bring about five families to the proposed colony, which, if all goes well, will be established next year.

In addition to this interesting group, the immigrant special brought west 80 Dutch farmers who will settle in the northern Alberta, mostly in the Peace River district. Several British families settling under the Empire Settlement scheme and British workers of all sorts made up the rest of the large party of immigrants.

General Sumner says, "Twice for peace does not insure it." No, and twice for a man doesn't make him longer, but it does start you toward a restaurant.

BRITAIN'S HIGH COMMISSIONER TO CANADA

Sir William H. Clark, K.C.M.G., who has just been appointed Great Britain's high commissioner to Canada, commenced his career in the public service as a clerk in the board of trade department of the government in 1869.

Boy World Explorer

That bright-eyed globes Adventure of whom everyone from the youngest to the eldest has dreamed has been chosen by Lowell Thomas, world-famous explorer and lecturer, to go with him as secretary of his next expedition into the jungles of Africa, to the South Sea Islands and into practically every corner of the globe.

Dixon, who is 20 years of age, has been employed for the past three years in the offices of the Canadian Pacific Railway at Winnipeg. When Lowell Thomas was lecturing in the city and made a statement to the press that he was looking for a Canadian boy to go with him in December, Dixon got busy and landed the job, that will mean a year or so of rare adventure. First class shorthand knowledge, and an aptitude for photography and mechanics were some of the most important requirements for the position. Satisfying Thomas along these lines, an agreement was reached.

The fortunate Winnipegger will, next month, leave the Press Department of the Company where he has been employed, and join Mr. Thomas at his home in the Berkshire Hills. From this point the start will be made about December on the great adventure that will carry him into many of the little-known corners of the globe.

Proved His Ownership

Chicago Man Obtained Police Station, Claimed It Was His

Yipk Deveris learned that there were 16 chickens in the South Chicago Police Station, which had been removed from a couple of boys. Since he had been mysteriously deprived of that many, he called around to claim them.

"How do you know they are yours?" asked the sergeant. "That's easy, if they're mine, they'll talk to me," came the reply from Yipk. He was led to the cell and admitted. A few words in Dutch and 14 hens started a riotous display of wings and clacking in response.

"They're yours, take 'em away," piped the sergeant above the uproar.

The Spartan never wrote a single line that was considered literature.

New Golf Course At The Banff Springs Will Be Unique Among The Golf Courses of the World

Canada will shortly possess one of the most beautiful and most unique golf courses in the world. Assisted by an army of skilled workmen Stanley Thompson, of Toronto, the internationally known golf architect, is making rapid progress with the construction of the new championship golf course which will be built on the Canadian Pacific Railway Company, at Banff, Alberta, and present indications are that the course will take its place at the top of the list of golf links on this continent whether inland or seaside.

Situated on the roof of the world and surrounded by the most magnifi-

cent mountain scenery imaginable, the Banff Springs will be unique among the golf courses of the world. It will be of full championship length, the plans calling for a yardage of 6,215 and 6,045. These fees will be of grass and will be in the whole time, the bunkering having been so carefully worked out that each set of tees presents practically a different course. The fairways will be doubly wide, there being two distinct routes to each hole.

A view of a completed portion of the links set in wonderful surroundings under the guardianship of the mighty snow-capped mountains.

Contrary to what one would expect in the mountains, there will be very little climbing to be done; in fact the grades will be easier than on most courses. Nine holes of the new course will be open for play during the present season. Combined with nine of the old course this will mean that visitors this year will be able to enjoy a full round of eighteen holes without perfect surroundings. Early in May, 1929, the new championship course will be thrown open.

THE FARM BARN

No Longer Overlooks the House In Importance On The Modern Homestead

Feminine movement and general increase in education may not be responsible, but it is certain that the farm barn, long the most carefully built structure on the American farm, today is of no more importance than the house.

This emergence of the farmhouse, for years a neglected feature on many farms into a carefully designed and rare building, is emphasized in a discussion of the residential and the modern American farm in the Farm and Fireside magazine for May. Farmers, as well as their wives, are in many cases realizing that the farm is capable of being an excellent place to live today, and not merely a place of hardship and work without recreation.

"An item of importance," says the magazine, "is the residential value of farms. This concerns the farm as a place to live, for agriculture is today both a business and a mode of life."

Right along with the value of a farm as a productive tract of ground for prospective farm buyer today, considers school, church and social facilities of the neighborhood, neighbors and the general healthfulness for his family says the magazine.

Motor Sled For Coasters

The trouble of walking back after a good ride down a hill has been obliterated by a motor sled that has just appeared in Germany. It is propelled by a cup-shaped gasoline motor. On the slide the drive-wheel is disconnected and the sled coasts. Then the engine is operated for the return trip. The sled has made nearly 20 miles an hour on level surfaces, and the footrests are heated by exhaust gas from the engine.

An artist was engaging a model. "Can you sit absolutely still?" he inquired.

"Oh, yes, rather," she replied, promptly, "I was in the Civil Service for several years."

The optician takes a day off when the rent collector comes around.

VETERAN RETIRES

W. A. Brown, General Superintendent of the Canadian National Railways, Edmonton, who, after 50 years of continuous railway service in Canada, retired on superannuation on May 1. In point of active service, Mr. Brown is the oldest railwayman in Canada, west of the Great Lakes. He was railroading when there was almost no west of Portage, Prairie. He has been General Superintendent at Edmonton since 1913.

Mr. Brown is succeeded by W. R. Dewar, formerly General Superintendent of the Canadian National Railways at North Bay, Ontario.

Higher Than Mount Robson

Mount Robson, 12,923 feet, long considered the highest peak in the Canadian Rockies, has been found to give up this distinction to a new mountain, which is 300 feet higher. It is to be named Mount Waboway, after a British Columbia pioneer. The recent discovery of this new peak demonstrates that Canada no doubt possesses many other wonders yet unknown.

Exported Carload Of Honey

For the first time in the history of bee-keeping in British Columbia, one bee-keeper in the Okanagan Valley has exported a full carload of honey from his own hives. His 520 colonies gave him an average of 175 pounds of honey per colony.

W. A. Brown, General Superintendent of the Canadian National Railways, Edmonton, who, after 50 years of continuous railway service in Canada, retired on superannuation on May 1. In point of active service, Mr. Brown is the oldest railwayman in Canada, west of the Great Lakes. He was railroading when there was almost no west of Portage, Prairie. He has been General Superintendent at Edmonton since 1913.

Expert Opinion On Dirty Eggs

Question Is One Of Very Great Importance To Producers

The question of dirty eggs is one which should be given more attention by producers if they are to realize the best prices for their product. This is the opinion of Mr. C. P. Rhodes, of P. Barnes & Company, Edmonton. Mr. Rhodes, who has had wide experience with egg marketing in the West, states that at this season of the year the eggs which grade Seconds and bring low returns to producers are comprised chiefly of dirty and soiled product. The elimination of these dirty eggs, which is quite possible by proper care and management of the flock, would mean a much greater revenue.

As an instance of the very great effect which dirty eggs are having on egg grading at this time of the season, Mr. Rhodes presented a comparative statement of the grading of the eggs received by his firm in the last week of February with the week ending April 21st. In the former week the eggs received showed 22 per cent. Extra 1st per cent. Firsts and 10 per cent. Seconds, while in the latter week there were only 10 per cent. Extra 2d per cent. Firsts, and 34 per cent. Seconds.

"The increase in the percentage of Seconds and the decrease in the percentage of the better grades," stated Mr. Rhodes, "is due almost entirely to dirty eggs. These two weeks' grading reports show a difference of 12 per cent in the percentage of Seconds and this affects the value of eggs very materially."

"It is unfortunate that this percentage of dirty eggs is heavier during the season of heaviest production and at a time when otherwise the eggs show a very good quality. Later in the season there are a lot of Seconds because the eggs are affected by hot weather and we get a lot of stale and broken eggs, but at this season of the year a large percentage of these Seconds are dirty eggs and the balance of those made up mostly of small eggs."

"The washed egg also," stated Mr. Rhodes, "is a very serious point, as it is a well known fact that these eggs will not keep when placed in storage. Washed eggs deteriorate very rapidly and must be used within a very short time or they are worthless."

Tractors In Great Demand

Machinery Firms Find It Hard To Fill Orders

A canvass of machinery firms in Saskatchewan shows that tractors are in great demand this year. The majority of firms stating that they are unable to meet the demand. Five firms reported a total of 1,092 tractors in the three months as compared with 403 for the same period last year. One other firm, not giving exact figures, reports sales over the three of last year and another firm reports sales nearly twice as large.

Develop Clay Products Industry

Western Canada Clay Products Workers' Association in convention at the University of Saskatchewan (the only western university with a ceramic department) has today convention expressed a determination to develop the clay products industry in the three prairie provinces to the fullest extent possible during the coming building season, the outlook of which is considered to be bright.

Open National Parks To Motorists

The building of first class motor highways and the provision of camps and other facilities have served to make the Canadian national parks much more accessible to our own people, and it is a noteworthy fact that Canadians are alive to the opportunities which are open to them; tourist records show that a higher percentage of Canadians is visiting these great reserves each year.

"Can you tell me what museum come into operation when I visit?" "Our laughing museum!" - Victoria, B.C., Oct. 1923

W. N. C. 1723

"SPEEDING" A FACTOR IN MOTOR ACCIDENTS

Causes 11 Per Cent. Of Crashes According To Investigation By Expert

"Does speeding cause most accidents?" is a question that just now is causing considerable discussion among people interested in safety on the streets and highways, and in means of lessening the number of accidents. Though some ardent motorists are contending that speeding is not playing such an important part in increasing the number of motor accidents, it is declared by R. L. Fordyce, who has made a special study of the subject, that speed is a contributing factor in accidents caused by motor vehicles. He says that reports received from scores of communities throughout the United States show that out of 47,670 motorists involved in accidents last year, 4,870 motor vehicles were crashing the speed limit when the crash took place. This number constitutes approximately eleven per cent. Only two other circumstances—"skidding" and "did not have right-of-way"—were reported more frequently than speeding. It was pointed out, also, that in many of the skidding cases, the accidents may have arisen from excessive speed.

In addition to the accidents charged directly to illegal speed, it is claimed that many other accidents would not have occurred had not the driver been going too fast for the conditions existing at the time. Many of the accidents were caused by the driver, cutting corners, and other common infractions would not have resulted in collisions if the drivers and kept their cars under control.

Beginning To Learn

Arthur Brisbane Has Evidently Changed His Opinion Of Canada. Arthur Brisbane, famous Hearst contributor, is not always complimentary in his reference to Canada or anything British. Apparently as he grows older, he is learning, for the Hearst publications:

"Business in Canada is booming; new high records indicated in many directions. That is good news for this country. Prosperous neighbors are the best."

"Canadians know how to do some things that, like the serpent on the rocks, are too much for us."

"In Canada government can and does own and run railroads successfully. They do not admit as we do, that our public men lack intelligence and honesty needed for public enterprise."

"In Canada they consider the mere existence of a child, even the small farmers, and the poorest companies come last."

"Here our power companies come first and the consuming public comes where. The consumer to the big company is what the young Frenchman states to Napoleon, simply useful material."

Turks Are Dropping Arabic

New Alphabet Is Another Step In Westernizing Turkey

Angora, Turkey. — The Turkish alphabet is to join those of many other lands in learning an alphabet beginning with A and ending with Z instead of the "Alif to Zay" of the Arabic. This is the latest enactment of the Turkish Parliament, which under the leadership of Chah Mustapha Kemal Pasha, has been Westernizing Turkey.

A new dictionary will be prepared so that the new alphabet may be taught in the schools. Newspapers will be printed partly in Arabic and partly in Latin characters, and the latter will be used for all official documents. Fifteen years will be allowed to accustom the folk to the new letters before the use of them becomes obligatory.

The chief argument used in favor of the change is that the difficulty of the Arabic is largely responsible for the illiteracy in Turkey. The Arabic alphabet has 32 characters, but since different forms are used at the beginning, the middle and the end of a word, there is an actual total of 96.

Prosperous Canada

"Bountiful for the year testify to the continued healthy economic condition of the country, and are indicative of the continued and improved opportunities for investment of capital and settlement. No country offers a more attractive field of hands and brains than the Dominion." — Sir Henry Thornton in annual review of operations of Canadian National Railways for 1923.

"I understand some of your boys have stopped laying?" "Yes; two of them."

"What's the cause?" "Motor car."

W. R. DEVENISH,

General Superintendent of the Canadian National Railways, North Bay, Ont., who has been appointed General Superintendent at Edmonton, Alberta.

New Word Coined

"Avigation" Defined As Meaning To Direct Or Manage Aircraft

One of the newest words in the United States flexible vocabulary, is "avigation." It was given its first official recognition in the New York State legislature when Senator J. Grenville Webb, of Dutchess, introduced a bill designed to place the state in full cooperation with the federal government in the development and regulation of aviation.

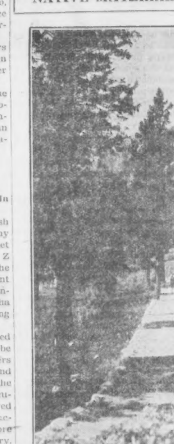

In Senator Webb's bill, the word "avigation" is defined as meaning: "To steer, direct or manage an aircraft in or through the air." The word has taken the place of "navigation" among aviators, and was coined last year, after the successful flight of Lieutenant Maudslayi and Humberger from California to Hawaii.

Building Big Elevator

The 6,000-foot high elevator being erected at head of Lake Superior for the Saskatchewan Wheat Pool will be completed by the middle of October. There are two agencies for this work; each will build 3,000,000 bushels of grain and the storage capacity of the workhouse will be 500,000 bushels. The cost of the structure will be about \$8,000,000.

It is usually too late to mend when a man finds himself broke.

NATIVE MATERIALS USED TO ADVANTAGE

When it was decided to build Jasper Park Lodge, the Canadian National Railways summer bungalow, in Jasper National Park, the native logs and boulders were chosen to be used as building materials whenever possible. The result has been that the guests at this magnificent summer hotel, which will be visited by the Canadian Weekly, its editors and their wives, after their Edmonton convention, find comfortable log bungalows set aside for them, and find that because these are of log construction they contain every comfort and convenience of the modern metropolitan hotel.

While there are bedrooms in the main lodge, a huge building constructed of native logs and boulders, and find that because these are of log construction they contain every comfort and convenience of the modern metropolitan hotel. The bungalows are arranged in rows, as shown in the accompanying photograph, and each of them commands an inspiring view of the mountain peaks which surround the lodge in every direction. The photograph shows Pyramid Avenue, so named from the magnificent Pyramid Mountain showing in the background. Jasper Park Lodge is constantly growing in popularity with the holidaying public and each year some thousands of Canadian and United States visitors enjoy themselves in this mountain playground. Jasper National Park, which is 5,200 square miles in extent, is Canada's largest national playground, and it is also a game sanctuary which contains many thousands of wild animals, which have become sufficiently tame to pay almost daily visits to the lodge grounds. Canadian National Railways photograph.

Sheep Prospects Good

Production On The Increase As A Result Of Prosperity Of The Industry

The outlook for sheep raising for the present year is regarded as encouraging by the Live Stock Commissioner, according to the latest Review of 1927, issued by the Live Stock Branch of the Department of Agriculture at Ottawa. Production is known to be on the increase as a result of the prosperity of the industry during the past few years. The production being done for the sheep industry by the Live Stock Branch as well as the various provincial live stock organizations have been very effective during the past few years and sheep fairs and sales are now a more or less permanent institution in certain parts of the country. The initial investment in breeding stock fortunately does not call for a very heavy outlay in cash and excellent assistance and advice being provided through the Sheep Clubs and in other ways is aiding in stimulating an interest in the raising of market sheep. This is true particularly in the older parts of the country but it is also true to some extent over the prairie.

Experiment With Pigs

An Average Price Of \$8.93 Received For 84 Pigs

The superintendent of the industrial farm at Portage in Prairie, Manitoba, reports an interesting experiment with littered pigs. Last September there were a number of litters on the farm and between February 22 and April 25, 84 pigs were marketed in Winnipeg and brought from \$8.85 to \$10.25 per hundred weight. The total weight of the pigs was 17,130 pounds and the total amount received for the 84 was \$1,229.35, or an average price per pig of \$8.93. The pigs were fitted for market with feed produced on the farm.

Balloon Flies In Nearly Every Province

The balloon fly is one of Canada's most widely distributed pests. It ranges along the Atlantic coast from Nova Scotia to Labrador, westward and northward through New Brunswick, Quebec and Ontario to Hudson Bay, the Prairie Provinces to Great Slave Lake, and westward to northern British Columbia and Yukon Territory.

B.C. FOREST TRACTS LARGEST IN WORLD

And Natural Conditions For Reproduction Most Favorable Says Chief Forester

The vast expanse of timber tracts in British Columbia is far in excess of that of Europe and natural conditions for reproduction are favorable.

This was shown by Mr. P. Z. Cavell, chief forester of the British Columbia addressing the Canadian Forestry Association, B.C. branch.

"The speaker dealt chiefly with the methods of forest perpetuation as employed in British Columbia and European countries. Mr. Cavell denied the conclusion of forestry and timber operators as being a combination of economics, botany, sentimentalism and transportation. "And then some," a quotation shown by the speaker on the screen revealed that the per capita area of B.C. forest tracts exceeded that of Finland, the largest producer in Europe, by about ten fold.

In a recent visit to the various timber producing areas of the province, Mr. Cavell observed the sparse growth in many of the most important supply areas.

While the area of forests in British Columbia was far in excess of any found in Europe, still another "peru of a new generation of trees" was being noted here, he added.

In a recent survey by his department it was revealed that 490,000 acres of timber are in a state of approaching maturity. This was only a part of the timber wealth of the province, the speaker declared.

Conditions for growth in British Columbia were more favorable than those prevailing in Europe, he pointed out. This was evidenced in a comparison of lodgepole pine stands in Finland and British Columbia, both of which had been planted fourteen years ago with Montana seeds.

The British Columbia stand had reached twenty feet in height, as compared with the 12-foot stand of the Finland trees. This variety of tree was destined to become an important part of the province's production, the speaker believed, as it is utilized chiefly for the manufacture of railway ties, of which the province produces three and a half billion annually, at a value of between 12 and 15 cents per tie.

Deined As "Qualified Person"

Women Are Recognized As Such When Taxes Are To Be Paid

At the courts before Judge Macdonald in the British North America Act, a woman is not a "qualified person" to sit in the Canadian Senate.

But a woman is a "person." She is even a "qualified person" when it comes to paying federal income taxes. Any woman with a taxable income could demonstrate the fact by refusing to pay. The courts would not tell her that she is a person, and hence a "qualified person."

The old Income War Tax declined a person as a person, which was particularly bright idea. It added, however, that the term included groups of persons as well. The Act said that "Persons mean any individual or person or any syndicate, firm, partnership, trust, or other body of persons, whether or not in somebody's mind that a man was a person and a woman an individual. But at any rate, women were liable to the tax and are still liable today, although the Act only taxes persons." There is no longer an attempt to define that word, except to point out that it includes certain groups such as bodies corporate.

So women (if any) who have been carrying about the latest decision of the Supreme Court can take heart of grace. They are persons when there is something to be paid, even if they cease to be qualified persons when assets are being allotted. They are persons in the House called Home, even if they are ineligible to the House called Tipper. In the former, indeed, they are not only "a person," but "the person," as group of people, which have become sufficiently tame to pay almost daily visits to the lodge grounds. Canadian National Railways photograph.

Rayon Industry Likely To Treble

Production Is Still Far Behind The Steadily Increasing Domestic Market

In a recent analysis of the artificial or rayon silk industry, the Department of the Interior, through its Natural Resources Intelligence Service, states that much though the production may be, the industry is growing rapidly and output will possibly be tripled in the near future. It is pointed out that Canada holds a prominent position in the world as a producer of the raw product—rayon pulp, and that in fact over half the world's requirements of this material is produced in Canada.

Two processes are in use in Canada for the production of rayon; the viscose process and the cellulose acetate process. The bulk of the world's rayon supply has so far been produced by the viscose method in which the raw material is bleached sulphite wood pulp, in the supply of which Canada holds a prominent position. A second silk plant established in Canada uses the viscose process; at present a large addition being erected to expand the plant to the point at which the principal raw material is cotton linters.

It is notable however that large quantities of acetate are manufactured in Canada will be used in the industry and that it will be a large user of Canadian hydro-electric energy. There is also, however, in this method will be used on to apply the cellulose acetate process in the treatment of wood pulp, thus utilizing Canadian raw materials entirely.

That there is an excellent outlook for the rayon industry in Canada is evident from the fact that production is still far from catching up with the steadily increasing domestic requirements. In 1927 alone imports of rayon and its products amounting to \$7,112,000 compared with \$5,500,000 in 1926. There have been reports so far of Canadian rayon yarn, but when the industry has been expanded sufficiently to take care of domestic requirements, there is little doubt that Canada will be heard from in world trade in this most useful textile.

Value Of Clean Seed Grain

10,000 Bushels Of Seed Grain Handled By Grading Plant

At Edmonton

Approximately 6,000 bushels of registered Marquis wheat and Victory and Banner oats were cleaned, graded, registered and marketed by the Provincial Cleaning and Grading Plant at Edmonton, Alberta, during the past winter. In addition a considerable quantity of high grade registered No. 1 seed has been sold on commission for farmers whose grain was not accepted at the plant, and a further 25,000 bushels of registered seed could have been disposed of if it had been available. The fact that fully 80 per cent of the grain sold through the plant was sold to Alberta farmers indicates a recognition of the value of seed grain which is clean, of good quality and true to variety.

Americans Look Over Old Fields

H. W. Dodge and E. A. McNamee of New York; Samuel Smith, of Great Falls, Montana, and R. L. Kerr, of Spokane, Wash., directors of the Tessa Corporation, were investigating the Southern Alberta oil field last month with a view of extending the refinery business of the corporation to that field. The Tessa Corporation and the California Petroleum Corporation were merged recently.

Many Inquiries For Farm Lands

Many inquiries for farm lands have been received by the Canadian Railway farm lands for the first three months of the year have been double those of the corresponding period of 1927. Inquiry for farm lands generally has increased in the same proportion.

"I wonder if we have left anything?" "We sold one in the newspaper (laughing)." — Pele Mels Paris.

For Humanity!

The world itself upon which is inscribed the names of men and women who have rendered distinguished service to the cause of humanity contains no name more worthy of such recognition than that of Henri Dunant, the centenary of whose birth in Geneva, Switzerland, was observed throughout the world on May 8th, of this year, and who lived to the ripe old age of 82 years.

What service did Henri Dunant render to mankind entitling him to this honor?

As a young man of 21 years, Dunant, author and philosopher, was traveling for pleasure in the summer of 1859 in Northern Italy, and happened to arrive in the neighborhood of Solferino just at the conclusion of the battle which is known by that name, and which was waged between the Austrians under Francis Joseph II, and the Allied French and Sardinians. The opposing forces were of about equal strength, the total of men engaged being something over 60,000. The armies met in the early morning and fought a sanguinary conflict until about two o'clock in the afternoon, when the Austrians were forced to retreat. For so short a battle the losses were large, totaling in killed, wounded, and missing about 30,000 men.

Upon such a scene of carnage came Henri Dunant accidentally in the course of his journey for pleasure. Suffering and dying soldiers left on the field filled the air with their cries and groans, but there was no organized care for them. His deepest sympathies stirred for these fellow-men, who but a few hours before were in the prime of health and strength, Henri Dunant organized the neighboring villagers who did what little they could to cope with the gigantic task of ministering to those whose lives might still be saved.

But Henri Dunant did more. The vivid and terrible scenes he had witnessed as impressed themselves upon his mind that a year or two later he published his experiences in a small volume entitled "Un Souvenir de Solferino" (A Remembrance of Solferino), in which he advocated the formation of voluntary organizations to aid the army authorities in carrying out the national obligation of caring for the sick and wounded in future campaigns.

The result was the organization of the great world-wide Red Cross Society.

In this day and generation, with the events of the Great World War still fresh in mind, it is unnecessary to attempt any review of this international, humanitarian organization. Sufficient it is to say that probably no other organization in the world's history has a finer record of achievement, or so completely commands the confidence and support of all peoples. The Red Cross flag and insignia is known and respected everywhere as a sign of absolute neutrality among warring nations, and the highest standard of self-sacrificing service to all suffering humanity.

Organized for service to the sick and wounded of armies in time of war, its amazingly efficient organization and outstanding service during the Great War so impressed the statement of the world confronted with all the difficulties of after-the-war reconstruction of a well-nigh bankrupt civilization, that the Peace Conference at Versailles unanimously called upon the Red Cross throughout the world to remain organized and active, and undertake a comprehensive program work among the civilian populations.

To the Red Cross, therefore, the creation of Henri Dunant, was accorded the distinction of being the only organization, apart from Governments, recognized in the Covenant of the League of Nations, with the solemn obligation imposed on all nations joining the League to encourage and promote the organization of voluntary national Red Cross Societies, having for their object "the promotion of health, the prevention of disease, and the mitigation of suffering throughout the world."

Today throughout the world, the Red Cross with its tens of millions of members, including all races, languages and creeds, is engaged in its mission of mercy. When Nature in a violent mood brings disaster upon a small community, or a Province, or even a nation, the Red Cross is the first on the spot. Should an epidemic of disease break out, the Red Cross nurse and voluntary worker, inspired by the heroic and humanitarian ideals of Dunant and Florence Nightingale, are active in the alleviation of suffering. Increasing, too, is the Red Cross contribution to the campaign for the promotion of health and the prevention of disease. And should war again inflict rankles, the Red Cross will be found better organized and stronger than ever to assist the burden thus imposed upon it.

In the galaxy of the world's great humanitarian, Rastetter, Jenner, Lister, Florence Nightingale, William Booth, Curie, and others, the name of Henri Dunant shines brightly, while the sympathy which prompted his action on the bloody field of Solferino, and the inspiration leading to his conception of a great national volunteer organization in the cause of suffering humanity, continues to call forth the most splendid self-denial and service under the banner of the Red Cross.

Stocking Alberta Fishing Waters
A total of 1,624,676 potential game fish were distributed in Alberta fishing waters in 1924. The fish were stocked in 100 lakes and rivers, including eyes, fry and fingerlings of Loch Leven, Cutthroat and Rainbow trout. In addition, nearly three million whitefish eggs were placed in commercial fishing waters in order to maintain the supply of fish for this growing industry in the province.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach's powers have been overtaxed. There is no cure save the way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a teaspoonful of water. It is pleasant, efficient, and harmless. It has renounced the standard with physicians in use 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid stomachs. Each bottle contains full directions—any drugstore.

Textile Plant For Edmonton

Mill At Edmonton Will Convert Western Wool Into Fabrics

The establishment of a plant in Edmonton by the Western Canada Woollen Mills, Ltd., is contemplated during the coming summer, according to an announcement made recently. This project has been under an exhaustive series of technical experiments. The mill production has been scheduled to include a range of fabrics including blankets, light and heavy tweeds, overcoatings, velours, flannels and other types of cloth, for which western wool is suited.

RICH, RED BLOOD A REAL NERVE TONIC

The Source Of All Nervousness Is Weak, Watery Blood

Many people, both men and women, find themselves run down through overwork, or anxieties. Such suffering is not themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nervous pains. All this comes from starved nerves. Doctoring with nerve tonics and poisonous relatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health, Dr. Williams' Pink Pills should be taken. These pills enrich the blood which tones the nerves, improves the appetite, gives new strength and spirit, and restores independent people bright and cheerful. Miss Irene Dunne, R.L. No. 1, Winnipeg, Ont., tells what Dr. Williams' Pink Pills did for her as follows: "I had been a part of over 15 years with my nerves and generally run-down condition. I grew so weak that I had to be helped a part of every day. I could not do any work and was taking medicine all the time. I was trying one medicine after another. I was advised to try Dr. Williams' Pink Pills and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and in a comparatively short time restored me to a state of good health. When I think of my nervous condition, I am most highly indebted to them to all weak, nervous people. You should begin at once to take Dr. Williams' Pink Pills. They will make you well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont."

Faces Carved On Building
Litheness Of Men Prominent In Chemical Plant Appear On New Building

Faces of living men are carved in stone on the new million-pound building of the Imperial Chemical Industries nearing completion at Westmount Exchange.

One of the faces is that of the head of the company, Sir Alfred Mond, and the other carvings are said to be excellent likenesses of many men prominent in the chemical world.

The sculpture around the building also includes figures of peacekeepers, which are said to be there as a symbol of inoperability, following the ancient tradition that the face of the peacock is unchangeable.

Nation-Wide Famine—There is scarcely a corner of this Great Dominion where the people of Dr. Williams' Pink Pills have not been tried and proved. It is one of the world's most efficient remedies for indigestion, lack of energy, and other ailments arising from impure blood. It is a powerful blood purifier and its power is readily absorbed, and it can also be used internally.

Film Industry In Calgary
Production of the first of a series of British films for use under Great Britain's quota law will be started in Calgary this month. May 1. Local capitalists, including P. Barn and A. E. Cross, are backing the project. Noel Hart will be the director of the first picture, which will be western in flavor.

There is no poisonous ingredient in Holloway's Colon Remedy and it can be used without danger or injury.

Buying Registered Seed

Saskatchewan Farmers Have Purchased Much More This Year. The Saskatchewan Registered Seed Association advises that farmers throughout the province have purchased more registered seed this year than in any year in the past and that they are becoming more interested in good seed. There has been a heavy movement of tractors from United States points to points in Saskatchewan this spring and the sale of motor trucks has greatly increased. Evidently farmers are becoming more and more interested in mechanical power.

During the war, Germany raised 12,000,000 men.

AFTER ALL
There's Nothing To Equal
Tal Bark
FOR THE SKIN!

Recipes For This Week
(By Betty Barelay)

QUEEN GEORGE'S CAKE
1 cup shortening.
1 1/2 cups sugar.
2 eggs.
1 cup sour milk.
1 teaspoon soda.
1 cup raisin juice.
1 cup nectar raisins.
1 teaspoon salt.
1 teaspoon nutmeg.
1 teaspoon cloves.
1 teaspoon cinnamon.
2 cups flour.

4 teaspoons baking powder.
Pumpkin raisins, drag and chop, using a coarse strainer. Cream together shortening and sugar. Add 3 beaten egg yolks and 1 whole (save remaining whites for frosting), raisins, nutmeg, salt, and raisin juice. Combine with flour sifted with baking powder, soda, salt, and spices. Mix thoroughly. Pour into a greased layer cake pan and bake 15 minutes in a moderate oven (350 degrees F.). Put together with boiled frosting.

JUNE WEDDING SALAD
Cook individual salad plates with crisp leaves of head lettuce. Place on these, strips of fresh or canned pineapple, one-half square of orange jelly, cut in small, and a few smaller sections of sweetened fruit pulp. Put with a mound of flavored whipped cream and a maraschino cherry or strawberry. Just before serving add a little lemon sauce—juice of one lemon mixed with two tablespoons granulated or powdered sugar. An ideal salad for wedding feast, or for a company dinner.

Record Building Activity

Building and construction contracts awarded in Calgary during the month of April, 1928, totalled \$26,315,800 in value, the largest total for any month ever recorded except for May, 1926, when \$27,139,700 worth of new work was contracted for. During April 1928, \$116,062,500 was the total of contemplated work to be done in this total is the largest ever recorded for any month without exception.

The accumulative contracts awarded to date for the first four months of the year is surprisingly large compared with previous years. It now stands at \$123,847,100.

Calgary's Population
Calgary's municipal report on the city's population places the total at 72,500 this spring. The figures given by the census of 1926 were 65,512. Two hundred houses were erected here last year, and 200 will be built this year. There is an increase of 20 per cent. in the quantity of household effects being brought in by new residents. Blocks and apartment houses are all full and hotels are operating at capacity.

Useful In Camp—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

Will Construct Power Plant
Construction of the first unit of a big power plant in the Estevan coal field is commenced by the Alberta Engineering Company—a \$750,000 project which will represent the first actual development of power in Saskatchewan by a central generating station for distribution over a wide territory.

Women feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Gray's Worm Expeller, which cleanses the system of worms and restores vitality.

National wealth of Canada is estimated as \$272 per head of population. Get in the line early and make sure of your share.

Minard's Liniment for falling hair.

"Can you give me an example of wasted energy?"
"Yes sir; telling a hair-raising story to a bald-headed man."

Heat naturally flows from a hot body to a colder one even in the electric refrigerator.

Wheat Pool Building

Fastest Grain Elevator

Elevator Now Under Construction Will Have a Capacity Of 6,000,000 Bushels

Work has begun on the construction of a 6,000,000 bushel, capacity grain elevator at Port Arthur for the Saskatchewan Wheat Pool, which is said, will be the most modern and the fastest operating terminal elevator in North America. It will be ready for operation about October 15, 1928. When completed it will be served by both the Canadian National and Canadian Pacific Railways, and will be able to receive as many as 600 cars of grain per day during the rush season. It will have a capacity of 300 cars per day of ten hours, and will be able to ship out grain at the rate of 150,000 bushels per hour.

The total length of the new elevator known as Terminal No. 5 will be 1,244 feet and the width 226 feet. The elevator tracks will provide space for 225 loaded cars to be loaded at one time, ready for dumping by the five automatic car chutes, each of which will completely unload a car of grain in ten minutes on its average. To take care of this immense volume of grain 28 elevator legs will be required to take the grain to the top of the elevator, from whence it is dumped into the scale garsers.

The completion of this terminal elevator will give the Saskatchewan Wheat Pool a total capacity of 22,974,000 bushels at the head of the Great Lakes which together with a 2,000,000 bushel terminal elevator at Buffalo and the space provided by the Pool country elevator at Saskatoon, will give a total grain storage capacity of more than 50,000,000 bushels for the 1928-29 crop year.

A Timely Suggestion
The farm hand took his gun for a lazy ride. Nine miles out in the country the horse dropped dead. Louise said she knew she'd drop dead, too, if she didn't get a horse.

"Suppose I give you a nice, sweet little dog that will put lots of life in you." "Are you sure that a nice will put lots of life in me?" "Positive, darling." "Then, suppose you kiss the horse."

The first advertisement printed in a newspaper was a "travel ad" in the Gazette of France, July 4, 1831, advertising the waters of Forges.

The promontories on each side of the Strait of Gibraltar are known as the Pillars of Hercules.

Fireproof Farm Construction
GYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations—for remodeling—for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gypcrete protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick and easy to apply. It can neither crack, warp, bulge or shrink. By filling the joints with Gypcrete Joint Filler you get a smooth, strong surface through which fire, heat, cold and sound cannot penetrate.

Gypcrete comes in broad, light, ceiling-high sheets of gypsum rock. Takes no sand and is especially suitable for Alaska—where it is a great saving in the cost of wintering a few seasons.

WORLD HAPPENINGS BRIEFLY TOLD

During 1927 the salmon catch in British Columbia totalled 1,260,326 cases and fell short of the 1926 production by 704,536 cases.

The Prince of Wales has decided to use a fast army two seater "plane" to fulfill his engagements around the country.

Fifteen Royal Air Force pilots have been killed in flying accidents since the first of the year; it was announced in the British House of Commons.

Chain broadcasting from the Atlantic to the Pacific will be undertaken by the Canadian National Railways radio stations next fall.

William Burr, 80, who came from Toronto in 1882 to organize British Columbia's schools at the request of Premier John Robson, is dead after a lingering illness.

Col. Charles A. Lindbergh has flown about 200,000 miles in his career as pilot, according to a report filed with the aeronautics branch of the commerce department.

With a view to promoting night flying in the Dominion the civil aviation branch of the department of national defence is to undertake a flight along along the shores of the St. Lawrence for 30 miles.

Captain Malcolm McPhee, veteran master of the steamer Keweenaw, has the double honor of having opened two ports this year, the Salt and the head of the lakes, securing two elk hats for his feet.

Workmen digging at Old Fort Erie, Ont., uncovered the skeletons of British soldiers and an Indian who fell during the American siege of the fort in the year of 1812. Fragments of a shell and the positions of the skeletons indicated that the four had been buried by the missile that killed them.

Co-Operative Wool Marketing

During Ten Years Of Operation More Than Thirty-Six Million Pounds Were Handled

More than 30,000,000 pounds of wool have been handled by the Canadian Co-operative Wool Growers, Ltd., Toronto, during the ten years that it has been operating. This association is a sales agency serving the provincial and local associations in the provinces of Canada from Nova Scotia to British Columbia. Wool of the 1927 clip was assembled by 16 local associations and delivered to the larger organizations for marketing. The 1927 receipt contained of 2,630,313 pounds of wool and 11,030 pounds of pelts. Of this amount 41 per cent. came from Ontario, 18 per cent. from Ontario, Manitoba, and Saskatchewan together furnished 18 per cent. of the total quantity.

In addition to marketing wool the association has handled sacks, twine, stockmen's supplies, and manufactured woollens. Total sales of these side lines for 1927 amounted to \$77,272.

Lawyer: Don't you think you are straining a point in your explanation?—Witness (a cock):—Maybe I am, but you often have to strain things to make them clear.

Science Discovering Secrets Of Leprosy

Caused By Bacteria, Says Professor Of Tropical Medicine

Leprosy, the dread disease, which sends its victims into colonies of "The Living Dead," has begun to give its age-old secrets.

New evidence relative to the ancient scourge, tend to show it is caused by a definite bacterium and is not contagious has been gathered by one of the famous "microbe hunters" of the University of California. He is Dr. E. L. Walker, professor of tropical medicine in the University Medical School, Berkeley, Cal., who recently returned from a 14 months stay in Honolulu. While there he carried on extensive investigations of the cause of leprosy at the Molokai Receiving Hospital.

Although Dr. Walker made it clear his findings are only tentative, he predicted that if they are sustained by further research they will be of great importance to the economic and governmental importance.

Here are the two conclusions reached as the result of his studies in Hawaii.

1. Leprosy is caused by a bacterium related to the fungus actinomycetes, a plant-like growth of microscopic size, which thrives on an living organism except that of man, but which is found in the soil virtually everywhere in Hawaii.

2. These bacteria enter the body in cuts or wounds about the feet, and are not transmitted by the leper, despite the cry of "unclean," which has driven him as an outcast from society.

That turned the talk to the modern counterpart of the tramp printer, the real journeyman, who drifted from town to town and was the main reliance of the old-fashioned country editor.

Small Town Papers

BY FRANK PARKER, STOKESBOROUGH

Directed by special permission from the Editor, The Journal, Mirror, Alberta.

(Continued.)

Awards like these, and the others which the association gives annually, are doing a great deal to stimulate country editors to produce better papers. The Brookings Register, in South Dakota, for example, has been awarded the best of the front page. That puts the Eastern publisher's motto, "the best is the enemy of the good," in a new light.

These awards are powerful incentives for the betterment of the country press, the others agreed, but two or three spoke simultaneously of the school of journalism as perhaps the most potent factor of all in the progress of the small-town newspaper.

"You didn't think that all this flock of boys and girls who are being graduated every year from the schools of journalism were getting city jobs, did you?" asked the speaker.

"I don't know just how many," he replied. "I don't know just how many there are—somewhere between thirty-five and forty universities, I believe—which have full-fledged journalism departments."

Willard Hoyer, dean of the Wisconsin University school, said that the fact that there were more jobs than there were graduates to fill them, and that the graduates were not as well prepared as the country editors, was a fact.

The question was in turn propounded to C. L. Hodgkins, manager of the Royal Bank of Canada, a branch of the bank, and president of the National Board of Trade.

"I do not agree with Mr. Watts when he predicts that Canadian banks should and will change a service fee for operating a savings bank account, for two reasons:

1. "While it is true that in some cases savings banks accounts are operating at a loss, this is the exception, as when a savings bank depositor has been secured, he seldom leaves a bank and in many cases the original deposit has grown, in a few years to a substantial balance and a profitable account and valuable connection for the bank.

2. "A small fee on small savings bank accounts would discourage many from acquiring the savings habit and while a fee, proportionate account would be avoided by charging a service fee, the small increase in profits from this source would be more than counterbalanced by the increase in profit that accrues from the property engendered by thrift and the savings habit acquired through the whole Dominion."

"Gentlemen," I said when we had got that far, "you have been breaking my head by degrees, and I am now completely bewildered. You have knocked my living illusions into a cocked hat. You have thrown round me the hellion, as it were. You have said what was once said by a responsible adventure into a world, commercial, efficient, prosperous, money-making business."

It is a horrible thing, nowadays by comparison. It is a Nebraska line type operator on the stock exchange, who was crowned Queen of the John County Palace, and I am not a printer ever achieved anything like that.

"I appeal moved them, though not precisely to tears. They hastened to assure me that the patent inside lives. The patent inside and its young brother, and the patent inside and its young brother, and the patent inside and its young brother."

A SERVICE CHARGE ON SMALL ACCOUNTS

Is Predicted By Toronto Man But Bank Manager Thinks Not

Are Canadian banks likely to follow the example of those in the United States, which levy a service charge on small accounts? In the Financial Post, A. D. Watts, a Toronto and New York stock broker, was reported as saying to a group of the younger financial men of Toronto, that this would come about.

The question was in turn propounded to C. L. Hodgkins, manager of the Royal Bank of Canada, a branch of the bank, and president of the National Board of Trade.

"I do not agree with Mr. Watts when he predicts that Canadian banks should and will change a service fee for operating a savings bank account, for two reasons:

1. "While it is true that in some cases savings banks accounts are operating at a loss, this is the exception, as when a savings bank depositor has been secured, he seldom leaves a bank and in many cases the original deposit has grown, in a few years to a substantial balance and a profitable account and valuable connection for the bank.

2. "A small fee on small savings bank accounts would discourage many from acquiring the savings habit and while a fee, proportionate account would be avoided by charging a service fee, the small increase in profits from this source would be more than counterbalanced by the increase in profit that accrues from the property engendered by thrift and the savings habit acquired through the whole Dominion."

MAY 20
JESUS TEACHING IN THE TEMPLE

Golden Text: "He taught them as one having authority."—Matthew 7. Lesson: Mark 12:13-14. Devotional Reading: Psalm 119:1-8.

Explanations and Comments
The Capstone Question in regard to the Pharisees, symbolized with the Herodians, led most Pharisees to ask the question, "Why did the Sadducees, yet they united with Herodians and Sadducees in a plot to smother Jesus. The men whom they sent to Jesus prepared their remarks by the Pharisees, the question they were about to propound was a dangerous one, and it was a question which was not afraid of consequences.

That regarded not the person of men, but of a truth. Jesus was about to propound was a dangerous one, and it was a question which was not afraid of consequences.

That regarded not the person of men, but of a truth. Jesus was about to propound was a dangerous one, and it was a question which was not afraid of consequences.

Criticizes Medical Inspection System

Hon. George Langley Says Sending Canadian Doctors to Britain Creates Antagonism

Canada was confronted with a blockade of British immigration to the Dominion as a consequence of the new medical inspection system. This opinion was expressed by Hon. George Langley, former Minister of Agriculture for Saskatchewan, at the immigration inquiry in Ottawa.

"The sending of Canadian doctors into Great Britain has completely antagonized the medical men of the Old Country and has created an atmosphere of antagonism toward immigration to Canada. It is all over the country from one end to the other," continued Mr. Langley. "It was only through a recognition of the facts that the blockade could be removed as the displacement of British doctors did not meet with British public approval."

"We have to clear away this antagonism in the Old Country," he declared. "Roster doctors should be used in conjunction with Canadian doctors in medical examinations at British ports."

Mr. Langley recounted his experience as a member last year of the Canadian farmers' tour of the British Isles. He was somewhat critical of the 3,000 family settlement scheme. The feeling in the Old Country, Mr. Langley stated, was that the scheme retarded the obtaining of the more desirable type of British immigrants such as the young single men.

</

GREAT BRITAIN IS ANXIOUS TO OUTLAW WAR

London.—Sir Austen Chamberlain, secretary of the foreign office, speaking in the House of Commons concerning the Kellogg outlay of war proposals, said that the British government not only warmly welcomed the initiative of the U.S. but was hopeful it would be successfully concluded and would mark a real contribution to world peace.

Sir Austen's statement followed remarks by Ramsay MacDonald, the Labor leader, who supported the Kellogg proposals.

"Our attitude toward this note is going to have a very considerable influence in 'Anglo-American relations,'" Mr. MacDonald said. "Nobody who has been in America recently or who has followed the American press will deny that these relations are not quite so good as they ought to be."

Sir Austen said he was in process in the ordinary diplomatic channels in treating on the proposals, although he had at first favored submitting the matter to a conference of international jurists, as the case of the Locarno pact.

This idea was dropped, however, he explained, when "one of the governments concerned"—understood to be the United States—indicated that it would not approve such a procedure.

The British attitude, the foreign secretary continued, had already been forwarded to the governments of the nations in order that the elements of the empire might seek a common position toward the proposal. He expected to transmit the reply to Secretary Kellogg soon after the completion of the dominions were received.

Sir Austen was heard with profound interest by the whole chamber.

The only mark of disapproval came when he said that war had never been used as it would be no policy by any British government of the present era. Here the Labor leader burst into protest, but the secretary maintained his position.

Ramsay MacDonald said first reaction was that the proposal was ridiculous, in view of the complicated nature of the problems and the simplicity of the Kellogg scheme. Later he was convinced that the plan was but a forward step in the battle for peace. Its realization, he said, would make it impossible for nations to threaten war, and thus prevent sowing the seeds of war.

David Lloyd George was another who argued that it would be no point in making reservations to the United States proposal.

Made Chancellor Of Oxford University

Viscount Grey Of Eldon elected Chancellor by Acclamation.

London.—Viscount Grey, of Eldon, former Secretary of State for Foreign Affairs, will be elected by acclamation to the chancellorship of the University of Oxford. He succeeds to the post of the late Viscount Grey. Apart from the gracious gesture to Viscount Grey the decision to elect him without a contest is generally regarded as an indication of the university authorities' desire to separate the chancellors from their association with politics.

Viscount Grey was foreign secretary from 1905 to 1916.

Hunting Gild With 'Planes'

New York.—An aeroplane hunt for gold in Ontario is planned by Jack Hannell, wealthy gold mine owner, who is president of the North Atlantic Exploration Company, has purchased a Fairchild monoplane for the trip and said that "Police officers would join the quest in June. The expedition would head for the Red Lake district of Northwestern Ontario."

Italian Naval Program

Rome.—A new Italian naval building programme was announced by the Under-Secretary Siriani in the senate recently. Siriani said the new programme contemplated proceeding with the construction of the construction of two 10,000-ton cruisers, four destroyers, and four submarines, for which contracts will be let this month.

Killed By Father's Car

Toronto.—A few minutes after her father had kissed her good night, 15-month old Ruth Davis, daughter of Mr. and Mrs. E. J. Davis, was run over and killed by a car driven by her parent in Milton, Ontario.

Would Follow British Plan

United Farmers Of Canada Have Scheme For Co-Operative Stores

Winnipeg.—An elaborate scheme for the organization of co-operative stores on the British model is now being drawn up by the United Farmers of Canada, according to W. M. Strathrope, minister of agriculture, promised most carefully to consider it suggested that all co-operative stores imported into Great Britain from countries where the food and mouth disease is prevalent should be placed in cold storage at the port of landing for three weeks.

Lord Kylsant, in opposing the suggestion, pointed out that 2,048,000 tons of food would be imported in Britain in 1927, of which 925,000 tons were imported chilled beef of a quality almost equal to the best home-killed beef. In order to secure imported meat in a satisfactory condition, however, it should be available in Britain within 21 days after being shipped.

If chilled meat had to go into cold storage for three weeks on arrival, he said, its value would be considerably reduced as it would have to be frozen. The result would be that the importation of chilled meat would cease and nearly half the people of Great Britain would have to consume frozen meat of an inferior quality and pay a higher price for it than they did at present.

May Consult League

Possibility Of China and Japan Submitting Dispute To Geneva

Geneva.—A protest from the League of Nations over Japanese military action in Shanghai is a possibility, Chong Lo, Chinese member of the League Council, said to the Associated Press correspondent. He said he was awaiting instruction from his government at Peking.

Chong Lo, who is now in Paris, but is coming to Geneva for the meeting of the council in June, said over the telephone that both Northerners and Southerners have the same view concerning the attitude of the Japanese in Shanghai. He thought it conceivable that both factions might agree to submit the dispute to the League of Nations.

Japan's attitude on the question of referring to the League of Nations the dispute is unknown here. The Chinese-Japanese conflict is regarded in Geneva as cutting straight across the Kellogg outlay of war proposal.

Looking For New President

University Of Alberta Will Seek Strong Man To Fill Vacant Position

Edmonton.—Hon. Ferns Baker, minister of education, will leave shortly for points east, on a tour of investigation that will have as its objective the location of likely successors to the vacant presidency of the University of Alberta.

He will go right across the Dominion to the Peace River province, and may also cross the line into the Eastern and middle states.

It has not been decided yet whether the new university president is to be a Canadian, but other things being equal, the preference will naturally be given to a man Canadian experience.

New Road To Coast

Project Road For Northern British Columbia Country

Victoria, B.C.—A new railway route pass through the mountains from the coast to the Peace River and northern British Columbia country was announced by H. M. Rolan, editor of the Portland Canal News, who was here on his way north to Bismarck.

"The new pass which has just been located for getting over the Xena and Skeena watersheds to the Finlay basin, is 3,500 feet lower than the original pass mapped under Sir Donald Munro," Mr. Rolan said.

It will mean a much easier railway route to the coast."

Alberta Mounted Rifles

Ottawa.—The 28th Regiment of the Alberta Mounted Rifles at Nanton, has been reorganized at High River. The department of national defense has announced. A regimental badge of revised design has been authorized for the Saskatchewan Light Infantry Battalion.

Governor Leaving Hong Kong

Hong Kong.—Sir Cecil Clementi, Governor of Hong Kong, has left for the mainland. He is returning via Canada. Sir Cecil Clementi has been governor of Hong Kong since 1925, and has been in public service in China for many years.

Man Power Plane

New York.—A model aeroplane, the motive power of which is obtained by a man, is being made, but is being demonstrated by Lehman Vail, who plans to construct a man-sized machine on the same theory. The model in test rapidly took the air.

Plan Meets Opposition

British House Discusses Cold Storage For Imported Meat

London.—Speaking for the government in the House of Lords, Lord Strathrope, minister of agriculture, promised most carefully to consider it suggested that all co-operative stores imported into Great Britain from countries where the food and mouth disease is prevalent should be placed in cold storage at the port of landing for three weeks.

Lord Kylsant, in opposing the suggestion, pointed out that 2,048,000 tons of food would be imported in Britain in 1927, of which 925,000 tons were imported chilled beef of a quality almost equal to the best home-killed beef. In order to secure imported meat in a satisfactory condition, however, it should be available in Britain within 21 days after being shipped.

If chilled meat had to go into cold storage for three weeks on arrival, he said, its value would be considerably reduced as it would have to be frozen. The result would be that the importation of chilled meat would cease and nearly half the people of Great Britain would have to consume frozen meat of an inferior quality and pay a higher price for it than they did at present.

Clash Between Jap Troops and Nationalists

Shanghai.—The Japanese 28th brigade under General Sotomura, bore the brunt of fighting between the Japanese and Nationalists forces. The Japanese were driven back to the coast, and the Nationalists were driven back to the coast. The fighting was very fierce, and the Japanese were driven back to the coast. The fighting was very fierce, and the Japanese were driven back to the coast.

When Sotomura's forces were returning to Tsinan they encountered a force of Chinese soldiers. The Chinese-Japanese conflict is regarded in Geneva as cutting straight across the Kellogg outlay of war proposal.

Chen Tiao Yuan was formerly governor of the province of Anhui and commanded the three nationalist armies which succeeded in cutting the Shanghai railway April 30 at Ningbo.

The Japanese were continuing to try their attempts to disarm the nationalists as rapidly as they came in contact with them in the Shanghai area. The Japanese forces had occupied the bridge across the Yellow River at Tsinan and other strategic points.

With the exception of the two encounters with Sotomura's forces most of the fighting was of a minor nature.

Would Have U.S. Mediate

Suggestion Made That Action Be Taken To Prevent War Between Japan and China

General.—The peace proposals of the League of Nations will be served if Washington should have a major and prevent war between Japan and China. The department of national defense has announced. A regimental badge of revised design has been authorized for the Saskatchewan Light Infantry Battalion.

Prominent Financier

London Mint Is Striking Coins For Free Market

Dublin, Ireland.—A few months hence the people of the Irish Free State will begin to handle new coins intended to replace British coins in local circulation. The contract for minting was given to the London Mint, which has submitted Dublin the first striking and now will proceed with production, beginning with silver coins.

The new coins will be of the same size as British coins up to half-crown, and no higher denomination will be coined at present. Provision has been made for a proportion of silver higher than that in British coins, in order to counteract any possible suspicion of the new coinage. The expense and the three-penny piece will be of nickel, the new three-penny piece being of the size of the British silver shilling, but without any milling. Bronze coins also are being struck, but it will take a little longer to substitute these for the corresponding British coins.

Alfred Loewenstein, financier, now in Canada, who, representing one-third of the ordinary stock of the company, is reported to be seeking to obtain control of British Traction Co., one of the world's largest public utilities.

Passports Required For Short Vacation

Week-End Tickets To Europe Cost British \$10.00 Extra

London.—A letter addressed by A. H. Jarvis, of Ottawa, to the United States consul-general here, steps taken by the State Department at Washington, which may result in the future acceptance of Canadian currency at all centres across the line.

"Restriction on this score on the part of Americans in many districts has long been a source of inconvenience and annoyance to Canadian visitors to the U.S. Although we are Uncle Sam's best customer and despite the fact that the American dollar is accepted without question over here, there are many places and business houses and hotels across the border where the Canadian dollar is not more regarded than if it were the paper of Soviet Russia."

British Bankers Worried

Over Flood Of American Capital Which Is Entering Canada

London.—Over 100,000 Americans are entering Canada, according to British bankers, who are worried by the flood of American money which is entering Canada, according to Major Hume Cronyn, London financier, who has just returned from a trip to England and the Riviera.

"It is impossible for us to secure money in England for anything like the rates at which we can secure it here," said Major Cronyn. "This is due largely to the interest of the U.S. in Canadian securities. The result is that British capital is naturally repelled from coming in to any great extent and the fear is felt in Britain that the new alignment of money power in Canada will have a very real influence on the British Empire. I heard this referred to in England as a menace."

Arrives In Big Plane

Ottawa.—Captain Alfred Loewenstein, Belgian multi-millionaire, arrived at Linderberg Field here in his big motorized monoplane, the largest machine Ottawa has ever seen. Captain Loewenstein and Mrs. Loewenstein were the guests of Premier Mackenzie King at dinner, at Laurier House. He declared emphatically that his visit to the capital was purely a social call.

JAPANESE FORCES IN CONTROL OF CITY OF TSINAN

Shanghai.—Japanese soldiers had cleared the last of the Nationalist forces from Tsinan, capital of Shantung province, and were in complete control of the city for the capture of which the Southerners had expended the entire force of their drive.

Reports of casualties involved in the expulsion of the Southerners from the city are indefinite, but loss of life is believed to be heavy for both Japanese and Chinese with the probability that many Chinese civilians will be numbered among the dead.

Three field batteries which the Japanese had placed in the foreign settlement, one near the United States consulate, started to shell the city with shrapnel early in the day. Most of the population fled to the Yellow River, caught unawares and a heavy slaughter is believed to have resulted.

In the course of the fighting the Japanese blew up the Southern and western corners of the city wall and what southerners were left in the city departed in a rout, being northward after crossing the Yellow River.

The Nationalists in the main amounted to no more than sniping, although occasionally small bands put up desperate fights to avoid dispersing and expulsion from the city by the Japanese.

According to Nationalist reports to this city, the Japanese now have complete control not only of Tsinan but also of the surrounding railway, and the south end of the bridge across the Yellow River, and the city of Kioten, located 15 miles east of Tsinan.

To Speed Mail Delivery

Canard Steamship Line May Use Airplanes For This Purpose

Montreal.—To further speed up delivery of mail to the Canadian West for Canada, it is understood that the Canard Line in Liverpool have been considering a scheme whereby their ships to the Laurentine will each carry an aeroplane to be released when the Gulf of St. Lawrence is reached, to deliver the mail to the important mail either via Montreal or to Quebec.

These plans have already been mentioned in the scheme yet, but say that it is quite feasible, as it is occasionally being carried out by the Canard Line.

At present there is complete air mail chain from Rimouski to Toronto, operated by the postal department.

Wins In World Race

Jap Beats Competitor Who Was Held Up

Tokyo.—Tabito Arai, riding the Eastern route, won the Globe encircling race with his fellow countryman, Ryuzo Kato, by his trip, in 23 days, 16 hours and 26 minutes. The Western bound competitor, who is now on his way crossing the Pacific ocean, raised his hopes of winning the novel race when the steamer carrying him from England to New York was delayed by fog and storms.

A prize of \$12,000 will be awarded Arai, while Kato gets \$500.

Amend Criminal Code

Ottawa.—The senate rejected the House of Commons bill amending section 98 of the criminal code by a vote of 22 to 22. This action makes it impossible for any person or association to advocate the employment of force to bring about changes in the governmental, industrial or economic conditions of the country, and gives certain powers to public officers to deal with violations of the act.

Landslide In Colombia

Bogota, Colombia.—Ten persons were killed and many injured in a landslide at the Yende-Cabana mines, according to information from Rio Rico. It is feared many more were buried alive and rescuers are endeavoring to reach the imprisoned men, the information said.

Send Flight To Tokyo

Le Bourget, France.—Captain Pelletier d'Oisy, Captain Gossin and mechanic, who had been sent to Tokyo by the Japanese government, are on the way, including Asia Minor, the Philippines, China and Japan.

German As Official Language

Cape Town, South Africa.—The South African government, by a vote of 9 to 8, passed a motion to amend the South African constitution to make German one of the official languages.

The salmoning and cleaning of the Mirror hotel was completed this week. We had the pleasure of being shown through the premises, and feel quite justified in complimenting Mr Stump for the efficient manner in which they have had this work carried out. Among the many improvements, many to be mentioned the parlor, which has been made very comfortable and will be very much appreciated by their patrons.

The rebuilding of the Content bridge at the Red Deer river is under way.

One of the most spectacular fires in Edmonton for many months occurred Tuesday last when the old Edmonton Hotel, Edmonton headquarters for Klondyke rush, was destroyed.

The Tuxis Boys and Trail Rangers are to have a field day on June 8th. The boys are to receive some training in running, jumping and throwing. Mr Hyslop is mentor for the Trail Rangers and Mr Stewart mentor for the Tuxis.

Carl McCormick of Mirror has started up in the garage business in Calgary, at 801, 1st St. East. He has secured the sole agency for the Valis car, a make which was in vogue a number of years ago, and taken over by the British govt. during the war. The first carload arrived in Calgary Saturday last.

Beau Geste, a gripping mystery-drama of the one remaining romantic arm of the military service in the world—the French Foreign legion. At the Grand theatre on Saturday.

Breathes there a man with soul so dead—who, whilst his industrious neighbor launches out on some good enterprise, will sit back and say "h-m-f-f—hell never make it go, that business never was any good". But there are two sides to everything. Some must help that which is to succeed, so why not all lend a helping hand to lighten the burden? And may we shout the gospel, Down With The Knocker!

It has been brought to our notice that some work is necessary at the cemetery, and we think it would be very appropriate if our citizens would arrange a date on which to all go out do whatever is necessary.

The Journal is having a phone installed next week.

A fatal disaster occurred on Saturday evening at 6 o'clock, when W. F. Moore was instantly killed in a freight collision about 25 miles north of Calgary. Mr Moore has been at Mirror for a good many years and is very well known here and also at Big Valley.

The following persons left for Edmonton to attend the banquet given to W. A. Brown, former general Superintendent of the Alberta district: J. D. Healy; J. Carrier; J. P. Watters; J. L. Scott; P. T. Turner.

It has been decided by the local business men to close on Wednesday afternoons.

A closely contested game of baseball was witnessed last Friday night when the Bashaw girls met our team. They were evenly matched and some very good play was in evidence but though our home team put up a valiant fight, the Bashaw girls got the best end of a 12-10 score.
